Antigen short nasal swab test kit - 5 pieces

Brand: Siemens - SARS-CoV-2 Rapid Antigen Test

Ref.A00109

Specifications

- Rapid virus detection based on a short nasal swab.
- **Very easy to use**, also for children and sensitive people.
- The test identifies the current infection during the acute phase of CoV-19, while the virus is still present in large quantities in the respiratory tract.
- More **efficient**: no lab appointment needed.
- No more discomfort during the test.
- Test at depth of 2 to 2.5cm in the nose.
- Easy to use according to instructions in the manual supplied.
- Quick "pos/neg" response in case of symptoms.
- Quick result after 15 minutes.
- The result is easy to read: negative / positive.
- **Very accurate** (positive = positive)
- Rapid diagnosis allows immediate application of the appropriate treatment.
- Avoids rapid spread of the virus within the working bubble.
- Ideal screening tool in case of cluster infections.
- **Also detects new variants.**

Packaging
