

# PROTECT<sup>®</sup> AND CARE

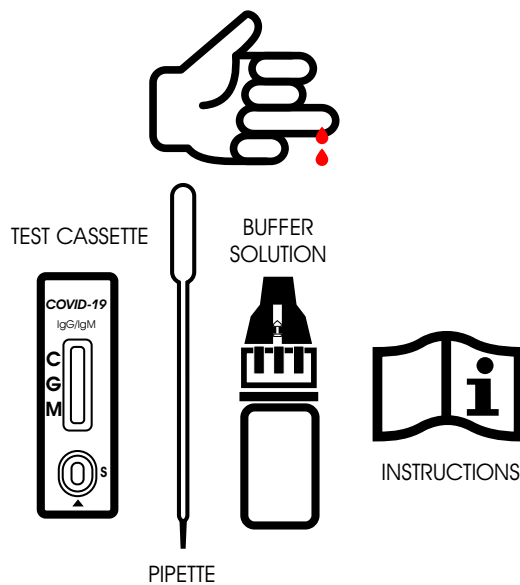

## PRODUCT FILE **IgM IgG Rapid Antibodies Test Kit** **York Biotech** Ref. A00083

### Specifications

#### **For use by HEALTHCARE PROFESSIONALS only.**

*According to this law, manufacturers, importers & registered distributors may only make the rapid antigen tests available to: Other registered distributors, except licensed pharmacies; exporters; triage and collection centers; licensed clinical laboratories, licensed hospitals, licensed physicians*

- Rapid test to check a blood sample for IgG and IgM antibodies to COVID-19 corona virus in human whole blood, serum or plasma. The antibody test (blood test IgG/IgM) can be used to determine if a person has had COVID-19 or is in the later stages of recovery.

- Easy to use (via **blood prick**)
- A quick result after 15 minutes.
- The kit contains all consumables needed to perform a test.

#### **Components** included in the kit:

- Test cassette: individually wrapped in foil bag with desiccant (25x)
  - Buffer solution (1x)
  - Pipette (25x)
  - Instructions for use/short guide (1x)
- The bulk does NOT include blood pricks & disinfecting alcohol wipes, these must be ordered extra.

**Caution!** The results of this test are for reference only and do not serve as the sole basis for diagnosis and treatment. Diagnosis must be confirmed in conjunction with clinical symptoms or other conventional testing methods.
